

**Family Tree Contracting LLC.**

Always pick up trash when walking anywhere. Be an example of this in front of my children and the youth teams I mentor in hopes to be replicated by them all.

We try to recycle as much metal as we can from the roofs. Specifically the old coolers we take off.

Get rid of pampers ,go back to cloth diapers,think about how it will open jobs with diaper cleaning business like old days and will.keep population down as everyone hates the smell of crappy diapers,am I the winner ?lol

**Jeff Barnett**

Try to come up for a way for Air Vent to recycle used ridge vent, edge vent so they can regrind/extrude new product.

I pick up recyclables when I'm on my walks. I get paid to walk. Lol

**Rana Durham**

I love to upcycle, replace plastic with glass and gardening

♥♥♥ Reduce, reuse, and recycle. Cut down on what you throw away. Follow the three "R's" to conserve natural resources and landfill space. So important!! I do Earth Day everyday! I don't buy things I don't need. I recycle and reuse everything I can. If I can't use something I try to find a good home for it! We all can do something to help! I am taking some things to Goodwill too for someone else to enjoy!

By stopping the hate and resentment that so many people have towards others and come together. If we don't do that, there is no way we can save our planet individually.

Recycle, conserve and don't be wasteful. Pickup trash as you see it and throw it away in the trashcans.

Put a brick inside the toilet tank and save water everytime it flushes by using a brick less of water.

**Mark S Duncan**

Recycle old shingles and not take them to the landfill. We had a company that did that for us but now the don't. They used to drop off the trailer and pick it up from the jobsites. It was awesome

I am hoping my area starts recycling. I will be washing clothes with cold water. I love ❤️ using my cloth tote bags.

**Eileen Alps**

Unplug any & all appliances appliances when not in use. (I mean not like the washer/dryer or range, ya turkey! 🐔)

Paper not plastic.

**Stacy Gregg**

Buy local. Buying local produce and other items reduces shipping distances from food sourced overseas, and also supports local businesses and communities.

Reduce, reuse and recycle! It's my mantra!

Trevor Atwell

We always participate in shingle recycling when it's available! It's a little more work to keep trash separate but worth the effort.

Stop using basic level plastics, bags, straws, etc

Benjamin Black

Demand that your clients use Air Vent products so that their roofs will last longer before being taken to the recycling plant and so that they will use less energy to heat and cool their homes.

I pick trash while canoeing, hiking and swimming. Also plan on Educating consumers and contractors on repairing homes for performance. Which will reduce some energy consumption.
