

## NEW Product from Air Vent

Replacing a roof is the perfect time to evaluate the attic ventilation and the gas vent caps. Air Vent now has “Type B” gas vent caps in three different sizes to fit pipes from 3 to 9 inches. Each one is adjustable within its size range: 3–5 inches, 5–7 inches, and 7–9 inches.

- For LP and gas-fired appliances. Our vent caps are exclusively for liquid propane and gas-fired appliances. They're not for wood-burning appliances.
- Designed for protection. Our unique design helps prevent Mother Nature, debris, and birds from entering the vent.
- Heavy-duty for durability. Aluminum construction resists rust and corrosion.
- Quick, simple installation. Our vent caps are fast and easy to install; you only need a wrench and screwdriver.

Vent caps are packaged 12 in a carton. They are ETL certified. For pricing, warranty, and availability call 1-800-AIR-VENT. Visit our website for the product information sheet [Vent Cap Page on Website.](#)
